Allinweb offers to all its private and public enterprise customers, of each dimension and sector, a high qualified expert advice in the following fields of activity:

• Financial Services
• Company & Banking organization
• IT- Administration
• Business Intelligence
• Data warehousing
• ERP integration and assessment
• Database Administration
• Network Security

We are a growing group acquiring good quality new client business and are looking to expand our **Financial Services Team** based in Zurich, with a talented :

System Engineer Websphere - ZURIGO

Main activities:

The WebSphere middleware platform needs to be engineered by professionals with application development expertise due to the fact that many configuration aspects have dependencies with the (business) application already during application design and strongly influence the application architecture (Build, Deployment, Clustering, Performance, Component Design, Session Management, Security, Multi DB and Multi Environment Management, Web Services, Messaging, etc.)

Desired experience:

Required:

Java EE, preferable on WebSphere products.
Some experience in medium to high complex Integration scenarios (e.g. WAS & LDAP).

Optional:

Engineering experience with WebSphere products
Deployment experience
Java EE security experience

Profile and competences:

Experience in J2EE System/Software integration and/or in Software Deployment/Assembly (I.e. as Developer or Coordinator between Application Development and System Engineering)
Good Knowledge of UNIX Sun Solaris
Good Knowledge of Websphere Application Server (Portal Server)
High Stress resistance and flexibility
Customer Orientation and organization flair
Communication and Team Work
English: Intermediate
French: Fluent
German and Italian: Nice to have
